Littering in Public Parks

Littering in Public Parks

— — —
-Littering is a common occurrence in public parks, the commons of this problem. This is harmful for the environment. They think that one piece of trash is not going to make much of a difference, but it adds up quickly.

-Stakeholders- community members, children, neighbors, animals, schools nearby

PROPOSED SOLUTION: Adopt a Park

[Adopt a Park]

- We are basing our solution off of the ‘bottom up’ model as it is using community agreement and cultural norms to manage the commons
- Open up positions for community members to adopt a public park
- Volunteers will be required to clean twice in the fall, twice in the spring
- This will help promote overall cleanliness, responsibility, and community

[LIMITATIONS OR QUESTIONS]

- Community Interest
 - Sponsorship of cans and possible flower gardens
 - Volunteers
- Government interest
 - Supplies to clean the park
 - Final garbage pick up
- Organization
- Funding
- Follow through
 - Support
